Base Data

Local Order Number PCRED7

Type PC5E

Color Red (RD)

- Features and Benefits**
- Exceeds Category 5e performance standards
 - Pre-tested with test results supplied
 - Manufactured with PVC Sheath
 - Available in standard lengths of 1m, 2m, 3m, 5m and 10m
 - Non-standard lengths available on request

Product Description Category 5e Copper Patch Leads are a critical component in ensuring the end to end performance of a network. The Category 5e Patch leads incorporate a low profile plug suitable for high density applications with an integral strain relief boot to minimise force on terminations and to assist in managing the bend radius of the cable.

Technical Description The cable consists of 8 colour coded copper conductors twisted together to form 4 pairs with varying lay lengths. The cable is sheathed in PVC material making the patch leads suitable for internal use.

HellermannTyton's Patch Leads are manufactured to the highest quality and tested to exceed the latest published versions of ISO/IEC 11801, BS/EN 50173 and ANSI/TIA/EIA 568-C.

NB. Part numbers shown are for standard lengths, other lengths are available.

Short Description Category 5e patch cord, 7.0 ft, Red, 1/pkg
