

<b>HellermannTyton</b> TYPICAL MATERIAL PROPERTIES	ACETAL Impact Modified Weathering Resistance For Exterior Applications	<b>SPECIFICATION NUMBER</b> <b>MTS1407CSU</b>			
		Issued By: LG 10/23/15	REVISION Level:...01 Date:...10/23/15 By...LG ECN#:...013285	Page 1 Of 2	
		Checked By: KAC 10/23/15			

**DESCRIPTION**

Modified POM copolymer. Easy flowing, elastomer-containing injection molding type in color black; especially weathering resistant, lower chemical resistance than our standard acetal; high resistance to thermal and oxidative degradation. Ranges of applications: for molded parts with matt surface.

Commercial Name: ..... Acetal  
Catalog Code: ..... POMUV  
Chemical Name: ..... Polyoxymethylene  
Used On: ..... Exterior applications, automotive channels

**GENERAL PERFORMANCE CHARACTERISTICS**

Heat Stabilized	Excellent
High Impact	Good
Moisture Sensitivity	Low
UV Resistance	Excellent

**PERFORMANCE ADDITIVES**

Glass	None
Mineral	None
Carbon Black	Contains significant amount of carbon black or other UV absorbing additives to be considered UV resistance

**PROCESS ADDITIVES**

Fillers	None
Shrink Additives	None

**CONDITIONING**

None needed. Properties do not improve with moisture absorption.

**CHEMICAL RESISTANCE**

Acids	Not suitable in strong acids
Bases	Not suitable in strong acids
Solvents	Excellent
Gasoline	Excellent
Oil	Good resistance to base oils and hydraulic fluids
Chlorine	Attacked by chlorine at concentrations of 3 to 5 ppm and higher.
Zinc Chloride	Not recommended. Zinc chloride acts to depolymerize (corrode) acetal resin. Not recommended where continuous exposure to salt water and contact with zinc plated steel (galvanized) is encountered due to an effect similar to corrosion by zinc chloride.
Ivory liquid	Not recommended
Antifreeze	Not recommended
Autoclave	This material should not be effected when used in an autoclave steam sterilization process at temperatures up to 250°F (121°C) for 25 minutes.

**MAJOR TOXIC ELEMENTS**

This product is essentially inert and nontoxic. However, if it is overheated or burns, gases such as carbon monoxide and formaldehyde may be released.

**APPROVALS**

Ford, Federal FMVSS302

Use in space is possible but may outgass Formaldehyde in vacuum. Gamma radiation causes loss in tensile strength and hardness.
