Features and Benefits

- PEEK cable ties provide excellent resistance to extreme temperature environments.
- Contour style head design provides additional space in constrained areas and provides high tensile strength with very low insertion force.

Product Description HellermannTyton PEEK cable ties are made of a high performance material providing temperature resistance up to +464°F (+240°C). The contour style head design takes up less space making it ideal for space constrained areas and guarantees high tensile strength, as well as a low insertion force.
