- Features and Benefits**
- Extended fir tree allows for a wide range of panel thicknesses.
 - Staggered fir tree branch design provides low insertion forces and high extraction forces.
 - Initial fir tree serves as a locating feature for assistance in blind assembly applications.

Product Description HellermannTyton's Clamping Convoluted Tube Clip provides a more robust securing solution than traditional convoluted tube clips. Once clamped down, the internal locking feature engages to provide extra strong retention force which is important for applications where both direct vertical and side to side load forces are a concern. Also, an internal rib feature spans the diameter of the clip which provides a secure fit around the indent found on convoluted tubing.
