

How to use images in TagPrint Pro 3.0

1. Create a new label.
2. From the image drop-down, select "File."

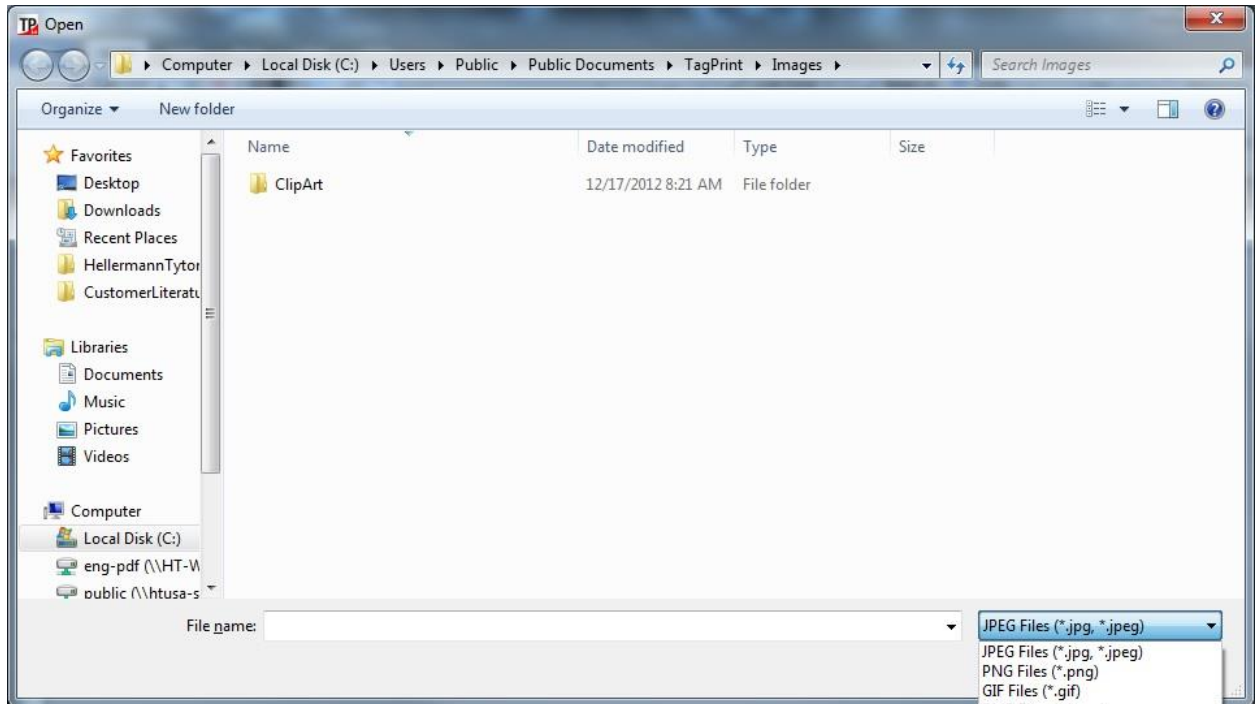

3. Draw a box indicated where you would like the image to go.]

4. Select the location of your file using the Windows Explorer window that automatically opens.

- From the drop down on the right side of the filename field, please select the type of image file that you are looking for.

- Select the image. It should appear in the box that you created.
